Subject Index

A

Acrylic resins, effects on PVC blends, 398
Acrylonitrile-butadiene-styrene, polycarbonate and, shell material for football helmet, 1113
Adhesive joints, laminated composites and, fracture, 77
Aging
puncture testing and, 773
viscoelasticity and, polymers, 141
volume and enthalpy recovery generalized to treat, 1275
Alcohol, craze growth assisted by, polycarbonate, 124
Aliphatic diols, polyurethane elastomers containing, 286, 1187
Aliphatic polyurethane elastomers, high performance properties, 672
Amides, curing reactions of epoxides with, kinetic model, 788
ARB monomers, polymerization of, segmental diffusion effects on growth, 753
Avrami theory of phase change, epoxy resin curing kinetics, 829

B

Bisphenol-a-polycarbonate
glassy, mechanical behavior of, 848
optical properties of, 1148
Blown film
countercurrent cooling of, 1380
linear low- and conventional low-density polyethylene, structure-property relations, 1182
Butadiene-acrylonitrile rubber/poly(vinyl chloride) blend, modification, 1137

C

Caprolactam, polymerization in an extruder, 1216
Carbon black
copolymers containing, rheology of, 1043
polymers containing, rheology of, 1035
Carbon dioxide, sorption of polystyrene, orientation effects, 1334
Catalyst fragmentation, propylene polymerization, 1436, 1448
Cell theory, calculation of surface tension, polymer liquids, 324
Chemiluminescence, polyethylene cable insulation by, 1170
Chemorheology, cure of unsaturated polyester resin, 955, 964
Chloro-polyether, melt rheology of, 402
Cold-drawing, ductile thermoplastics, 262
Composites: *see also* specific composite
inelastic, deformation and fracture characterization, potentials and, 63
laminated, fracture of adhesive joints and, 77
Compresison molds, sheet molding compound, thermal cure and analysis, 218
Copolyester, liquid crystaline, polymer blends, morphology and rheology, 653
Copolymers
carbon black, rheology, 1043
polypropylene block, dynamic mechanical properties and morphology of, 254
Copolymer blends: *see also* specific blend
oxygen permeation of, siloxanes and poly(methylmethacrylate), 1611
polycarbonate-styrene acrylonitrile, injection molded, properties and morphology, 627
Copolymer films, styrene-acrylonitrile, biaxally oriented, shear yielding of, 1095
Copolymerization
free-radical, mode of termination, 553
multicomponent, semibatch emulsion of, computer modeling, 470
styrene/butyl acrylate, with layer morphology, 463
Copolymer melts, ABA block, yield stress and flow measurements, 586
Copolyterephthalate, uniaxial drawing of, based on ethylene glycol and 1,4-cyclohexane-dimethanol, 913
Coupling model, nonlinear viscoelasticity and yield, 2
Crack healing, intermolecular interaction in polymer alloys, 149
Crack instability, fracture toughness and, tough polymers, 1128
Crack propagation modes, fatigue lifetime behavior, amorphous polymers, 46
Crack tip damage zone, fracture, Hexcel F185 and T6T145/F185, 33
Craze growth, alcohol assisted, polycarbonate, 124
Creep, 26-year, poly(vinyl chloride) and polyethylene, 582
Crystalline polymer solids, fracture and toughness of, 41
Crystallization
melting and, unusual blend of propylene copolymers, 458
PET/PMMA, 451
solvent-induced, compatible polymer blends, 1265
stain-induced, fluoroelastomers and, 1203
water, at filler inclusions, 1653
Curing
epoxy resin, Avrami theory of phase change, 829
kinetics, epoxide/anhydride/amine resin system, 1317
unsaturated polyester resin, 964
1,4-Cyclohexane-dimethanol, copolyterephthalate based on, uniaxial drawing of, 913

D

Detergents, high density polyethylene in, stress-cracking of, 82
Devolatilization
melt, polymers, 510
polymer, diffusion coefficient model for, 303
Die, temperature, polymer melts and, 1079, 1088
Diffusion coefficient model, polymer devolatilization, 303
Dimethyl terephthalate, melt transesterification of, with ethylene glycol, model, 1703
Dispersed phase, formation of, incompatible polymer blends, 335
Dissolution phenomena, studies, microlithography, 282
Draw resonance, polypropylene melt spinning, 192

E

Elastic modulus
thin-walled structural foam beams, 990
glassy polymers, 1015
Elastomers
aliphatic polyurethane, high performance properties, 672
polyurethane, polybutadiene and aliphatic diols, 1187
urethane, nonlinear response and thermomechanochemical degradation, 131
Energy density, cohesive, glassy polymers, 1015
Energy storage, high strain, simulation, large plastic structures, 1006
Epoxide/anhydride/amine resin system, cure kinetics of, 1317
Epoxides, curing reactions with amides, kinetic model, 788
Epoxy resins, ductility of, additives for improvement of strength, 1620
Equilibrium melting temperature, supermolecular structure and, polyoxetanes and polyethylene oxide, 781
Esters, phosphorous, polymer sorbents for, 693, 703
Ethylene glycol
copolyterephthalate based on, uniaxial drawing of, 913
dimethyl terephthalate with, melt transesterification, model, 1703
Ethylene-propylenediene terpolymer rubber, adhesive tack and green strength of, 1195
Extruders
polymerization of caprolactam in, 1216

Subject Index

A

Acrylic resins, effects on PVC blends, 398
Acrylonitrile-butadiene-styrene, polycarbonate and, shell material for football helmet, 1113
Adhesive joints, laminated composites and, fracture, 77
Aging
puncture testing and, 773
viscoelasticity and, polymers, 141
volume and enthalpy recovery generalized to treat, 1275
Alcohol, craze growth assisted by, polycarbonate, 124
Aliphatic diols, polyurethane elastomers containing, 286, 1187
Aliphatic polyurethane elastomers, high performance properties, 672
Amides, curing reactions of epoxides with, kinetic model, 788
ARB monomers, polymerization of, segmental diffusion effects on growth, 753
Avrami theory of phase change, epoxy resin curing kinetics, 829

B

Bisphenol-a-polycarbonate
glassy, mechanical behavior of, 848
optical properties of, 1148
Blown film
countercurrent cooling of, 1380
linear low- and conventional low-density polyethylene, structure-property relations, 1182
Butadiene-acrylonitrile rubber/poly(vinyl chloride) blend, modification, 1137

C

Caprolactam, polymerization in an extruder, 1216
Carbon black
copolymers containing, rheology of, 1043
polymers containing, rheology of, 1035
Carbon dioxide, sorption of polystyrene, orientation effects, 1334
Catalyst fragmentation, propylene polymerization, 1436, 1448
Cell theory, calculation of surface tension, polymer liquids, 324
Chemiluminescence, polyethylene cable insulation by, 1170
Chemorheology, cure of unsaturated polyester resin, 955, 964
Chloro-polyether, melt rheology of, 402
Cold-drawing, ductile thermoplastics, 262
Composites: *see also* specific composite
inelastic, deformation and fracture characterization, potentials and, 63
laminated, fracture of adhesive joints and, 77
Compresison molds, sheet molding compound, thermal cure and analysis, 218
Copolyester, liquid crystaline, polymer blends, morphology and rheology, 653
Copolymers
carbon black, rheology, 1043
polypropylene block, dynamic mechanical properties and morphology of, 254
Copolymer blends: *see also* specific blend
oxygen permeation of, siloxanes and poly(methylmethacrylate), 1611
polycarbonate-styrene acrylonitrile, injection molded, properties and morphology, 627
Copolymer films, styrene-acrylonitrile, biaxally oriented, shear yielding of, 1095
Copolymerization
free-radical, mode of termination, 553
multicomponent, semibatch emulsion of, computer modeling, 470
styrene/butyl acrylate, with layer morphology, 463
Copolymer melts, ABA block, yield stress and flow measurements, 586
Copolyterephthalate, uniaxial drawing of, based on ethylene glycol and 1,4-cyclohexane-dimethanol, 913
Coupling model, nonlinear viscoelasticity and yield, 2
Crack healing, intermolecular interaction in polymer alloys, 149
Crack instability, fracture toughness and, tough polymers, 1128
Crack propagation modes, fatigue lifetime behavior, amorphous polymers, 46
Crack tip damage zone, fracture, Hexcel F185 and T6T145/F185, 33
Craze growth, alcohol assisted, polycarbonate, 124
Creep, 26-year, poly(vinyl chloride) and polyethylene, 582
Crystalline polymer solids, fracture and toughness of, 41
Crystallization
melting and, unusual blend of propylene copolymers, 458
PET/PMMA, 451
solvent-induced, compatible polymer blends, 1265
stain-induced, fluoroelastomers and, 1203
water, at filler inclusions, 1653
Curing
epoxy resin, Avrami theory of phase change, 829
kinetics, epoxide/anhydride/amine resin system, 1317
unsaturated polyester resin, 964
1,4-Cyclohexane-dimethanol, copolyterephthalate based on, uniaxial drawing of, 913

D

Detergents, high density polyethylene in, stress-cracking of, 82
Devolatilization
melt, polymers, 510
polymer, diffusion coefficient model for, 303
Die, temperature, polymer melts and, 1079, 1088
Diffusion coefficient model, polymer devolatilization, 303
Dimethyl terephthalate, melt transesterification of, with ethylene glycol, model, 1703
Dispersed phase, formation of, incompatible polymer blends, 335
Dissolution phenomena, studies, microlithography, 282
Draw resonance, polypropylene melt spinning, 192

E

Elastic modulus
thin-walled structural foam beams, 990
glassy polymers, 1015
Elastomers
aliphatic polyurethane, high performance properties, 672
polyurethane, polybutadiene and aliphatic diols, 1187
urethane, nonlinear response and thermomechanochemical degradation, 131
Energy density, cohesive, glassy polymers, 1015
Energy storage, high strain, simulation, large plastic structures, 1006
Epoxide/anhydride/amine resin system, cure kinetics of, 1317
Epoxides, curing reactions with amides, kinetic model, 788
Epoxy resins, ductility of, additives for improvement of strength, 1620
Equilibrium melting temperature, supermolecular structure and, polyoxetanes and polyethylene oxide, 781
Esters, phosphorous, polymer sorbents for, 693, 703
Ethylene glycol
copolyterephthalate based on, uniaxial drawing of, 913
dimethyl terephthalate with, melt transesterification, model, 1703
Ethylene-propylenediene terpolymer rubber, adhesive tack and green strength of, 1195
Extruders
polymerization of caprolactam in, 1216

single screw
melt conveying section of, temperature profile, 504
metering zone of, torque in, 181
scale-up of, 1059
Extrusion
hydrostatic solid state, biaxial orientation of polypropylene by, 869, 876
rubber, generalized power-law fluid in converging sections, 1371

F

Fatigue crack growth
loading history effects, HDPE and PMMA, 110
subcritical, shear and craze competition in, 46
Fatigue failure mechanisms, polymers, 271
Fillers, water crystallization, pressure of, 1653
Flory-Huggins theory, modification of, system polystyrene-polybutadiene-chloroform, 1688
Fluorine-containing plasmas, polymers with, surface modifications, 861
Fluoroelastomers, elastic and thermoelastic properties of, stain-induced crystallization effects, 1203
Foam, rigid structural, effective elastic moduli for, beams, 990
Football helmet, performance, influence of materials and structure, 1113
Formaldehyde, modeling of polymerization, functional group approach, 925
Fourier transform infrared studies, poly)ethylene terephthalate)/poly(amide-6,6) blends, 562
Fourier transform mechanical anaysis, nonlinear viscoelasticity of polymers, 165
Fractography, ultrasonic, fracture instability of glassy polymers, 25
Fracture
adhesive joints, laminated composites and, 77
characterization, deformation and, inelastic composite materials, potentials and, 63
crack tip damage zone for, Hexcel F185 and T6T145/F185, 33
dynamic instability, glassy polymers, ultrasonic fractography, 25
plane stress ductile, linear polyethylenes, 804
surface characteristics, unfilled thermosets, 55
toughness
crack instability and, tough polymers, 1128
crystalline polymer solids, 41
urethane-modified methacrylate resins, 669

G

Gas chromatography, inverse, polybutadiene/solute systems, 1141
Gas separation processes, material selection considerations for, 603
Gelation, untouched impact bend test assessment, unplasticized poly(vinyl chloride) pipe, 277
Gel point, cross-linking polymer, detection by G'—G" crossover, 1698
G'—G" crossover, detection of gel point, cross-linking polymer, 1698
Glass transition, compatible polymer blends, 618
Graphite/epoxy composites, nonlinear viscoelastic characterization of, 116
Guar gum solutions, viscosity, parallel plate rheometer, 598

H

Heat capacity jump, glassy polymers, 1015
Heat transfer, during polymerization, motionless mixers, 1386
Hexcel F185 neat resin, fracture, crack tip damage zone for, 33

I

Injection molding
amorphous polymers, injection molding in, 1069
impact-modified polypropylene blends, skin-core morphology and failure of, 241
peak cavity pressure, 1411
PET/PMMA, 451
polymer-filler redistribution, prediction of, 1105
process control, review, 1345
reaction
adiabatic reactive viscometry for polyurethane, 1237
novel reinforced, 1209
polyurethane, microstructure and mechanical behavior, 1258
process of polyurethane-unsaturated polyester blends, 1243, 1252
thermoplastics
characterization of molecular orientation in, 917
dynamics and control of pressure, 1403
Inomers, nuclear magnetic resonance studies, 1504
Integral-skin foam, rigid polyurethane, insulation cases for car air conditioners, 1323
Intergranular stress waves, propagation of, estimation of speed, 1310
Internal mixing, intermeshing rotor and operating variable effects, 1358
Internal pressure tests, electrical conduits of poly(vinyl chloride), 1469
Interpenetrating polymer network, polyurethane based, polymerization of, 716
Ionic impurities, water, plastic and Pyrex bottles, 611
Isothermal differential thermal analysis, polyolefins observed by, thermo-oxidative degradation of, 945

K

Kinetics equation, mechanical degradation, testing, 1713

L

Light-scattering, polyblends, multiple-scattering conditions, 1601

M

Mandrel dies, spiral, flow distribution in, 186
Melamine, modeling of polymerization, functional group approach, 925
Melting, crystallization and, unusual blend of propylene copolymers, 458
Methacrylate resins, urethane-modified, fracture toughness, 669
Microcellular foam, nucleation of, 485, 493, 500
Microlithography, dissolution phenomena in, 282
Mode of termination, free-radical copolymerization, 553
Mold filling, space-time distributions, 1229
Molecular composites, thermoplastic rigid rod, thermal analysis studies, 1557
Molten polystyrene-hydrocarbon systems, measurement and correlation of mutual diffusion coefficients, 837
Mono(hydroxyethyl) phthalate, divalent metal salts, polymers based on, 233
Morphology
layer, styrene/butyl acrylate copolymerization with, 463
mixing effects, polyethylene blends, 202
PET/PMMA, 451
Multilayer composites, dynamic mechanical behavior, 568
Mutual diffusion coefficients, measurement and correlation of, molten polystyrene-hydrocarbon systems, 837

N

Necking, thermal effects in, polymers, 1399
Neutron scanning, small-angle, molecular characterization of PMMA/PEO, 433
Nylon fibers, fatigue and environmental resistance, 1121
Nylon 66 film, biaxally oriented, properties of, 558

P

Peak cavity pressure, injection molding, 1411
Phase transitions, during shear flow, two-phase polymer blends, 344, 351
Phenolic resole resins, shelf life of, 976
Phosphonofluoridates, permeation, high polymer matric, 1338
Planar welding flows, simulation of, 1390
Poly(2,6-dimethyl-1,4-phenylene oxide)
blend of polystyrene, diffuse shear banded zones of, 647
blend with polystyrene, primary (glass-to-rubber) transition region, 1284
Polyamide/acrylonitrile-butadiene-styrene blends, structure property relations, 1582
Poly(amine-6,6) blends, poly(ethylene terephthalate), 984
Polyarylate, polycarbonate blend,

phase behavior and mechanical properties, 1642
Polyarylate/polybutylene terephthalate blends, melt rheology of, 529
Polyblends, light-scattering characterization, multiple-scattering conditions, 1601
Polybutadiene
ploy urethane elastomers containing, 1187
polyurethane elastomers containing, 286
Polybutadiene rubber, modification of butadiene-acrylonitrile rubber, 1137
Polybutadiene/solute systems, thermodynamic interaction, inverse gas chromatography, 1141
Poly(butylene terephthalate), high-temperature large-strain behavior of, 101
Polycaprolactam, ABS materials with, structure property relations, 1582
Polycarbonate
acrylonitrile-butadiene-styrene and, shell material for football helmet, 1113
bisphenol-A, optical properties of, 1148
blend with poly(hexamethylene sebacate), physical properties, 440
craze growth, alcohol assisted, 124
dynamic mechanical behavior, 568
glassy, puncture testing, 773
high-temperature large-strain behavior of, 101
polyarylate blend, phase behavior and mechanical properties, 1642
poly(hexamethylene sebacate) blend, molecular weight and compatibility, 1530
under clearance-fit pin loading, failure modes for, 1681
Polycarbonate/acrylonitrile-butadiene-styrene blends, properties of, 632
Polycarbonate-styrene acryonitrile, copolymer blend, injection molded, properties and morphology, 627
Polycondensation step, polyethylene terephthalate formation, semibatch reactors, 740
Polyehtylene, recovery, 26-year creep and, 582
Polyepichlorohydrin blends, melt rheology of, 402
Polyester, fatigue and environmental resistance, 1121
Polyester blends: *see also* specific blend
polyurethane-unsaturated, reaction injection molding process of, 1243, 1252
Polyester resin
unsaturated
chemical structure of low-profile additives and, 964
chemorheological model for cure of, 955
Polyetherimide, high-temperature large-strain behavior of, 101
Polyethylenes
bottles, ionic impurities in water and, 611
cable insulation, chemiluminescence measurements, 1170
chlorinated, effects on PVC blends, 391, 398
effects on PVC blends, 391
extruded medium density, anisotropy of tear strength, 1675
high density
detergents, stress-cracking of, 82
fatigue crack growth, loading history effects, 110
high-density film, loss of 2-tertiary-butyl-4-methoxy phenol from, 934
linear, plane stress ductile fracture, 804
linear low density
extensional flow of, 380, 1523
molecular characterization, 359
shear flow of, 367, 1512
linear low- and conventional low-density, structure-property relations, 1182
oxidized high density pipes, morphology, 727
Polyethylene blends: *see also* specific blend
characterization with TREF techniques, 1562
high and low density, mechanical and flow properties, 640
high density, structure formation during flow, 1662
mixing effects, morphology, rheology, and mechanical properties, 202
Polyethylene/inomer/polyamide-6 blends, understanding, 1495
Polyethylene oxide, supermolecular structure, equilibrium melting temperature relations, 781
Polyethylene parts, ultra-high molecular weight, shrinkage analysis, 524
Polyethylene/polypropylene blends, linear low density, rheological properties of, 1627
Poly(ethylene terephthalate)
fibers, melt spinning of, 1050
films, simultaneously biaxially stretched, 893
formation, polycondensation step of, semibatch reactors, 740
poly(amide-6,6) blend relations, 984
polypropylene mixture, permeability of, 622
virgin and recycled, calorimetric and mechanical properties, beverage bottles, 796
Poly(ethylene terephthalate) blends, permeability barrier applications, 1574
Poly(ethylene terephthalate)/poly-(amide-6,6) blends, spectroscopic study of, 562
Poly(ethylene terephthalate)/poly-(methyl methacylate)alloys, crystallization behavior, injection molding and morphology of, 451
Poly(hexamethylene sebacate)
blend with polycarbonate, physical properties, 440
polycarbonate blend, molecular weight and compatibility, 1530
Polyimide films, gas sorption and transport, casting and curing condition effects, 211
Polymer alloys, intermolecular interaction of, studied by crack healing, 149
Polymer blends: *see also* specific blend
compatible
glass transition of, 618
solvent-induced crystallization of, 1265
flows, structure formation during, 1662
incompatible
control of interfaces in, 328
formation of dispersed phase in, 335
isotropic, thermotropic liquid crystalline and, 410
laminar morphology in, 663
liquid crystalline copolyester, morphology and rheology, 653
phase diagrams, various pressures, 315
ternary, phase behavior of, 1657
two-phase, shear flow of, phase transitions during, 344, 351
Polymer fibers, formation of, rapid expansion of supercritical fluid solutions, 1693
Polymeric adhesives, coupling between stresses and moisture diffusion, 731
Polymeric films
biaxally drawn, orientation in, 1021
coextruded composite, biaxially stretched compared with conventionally blown, 225
Polymeric systems, enthalpic interactions in, 1482
Polymerization
ARB monomers, segmental diffusion effects on growth, 753
batchwise radical chain, minimum end time policies for, 573
heat transfer during, motionless mixers, 1386
modeling of, functional group approach, 925
propylene, catalyst fragmentation during, 1436, 1448
Polymer liquids, surface tension, 324
Polymer melt
die temperature effects, 1079, 1088
elongation, methods, results and recent developments, 537
Polymer networks, interpenetrating, computer-controlled multiple-stream RRIM production of, 1209
Polymers
amorphous, injection-molded, residual stresses in, 1069
as substrates and media for data storage, 1421
based on divalent metal salts, mono(hydroxyethyl) phthalate, 233
blends of polystyrene and thermotropic liquid crystalline polymer, novel reinforced base, 684
carbon black, rheology, 1035
cross-linking, gel point, detection by G'—G" crossover, 1698
devolatilization, diffusion coefficient model for, 303
ductile, tensile and puncture test behavior, 262
fatigue failure mechanisms, 271
glassy
correlation of elastic modulus, cohesive energy density and heat capacity jump of, 1015
dynamic fracture instability in, ultrasonic fractography, 25
mechanical properties, residual

stress effects, 1473
highly deformable, contact loading of, stress fields in, 979
isotropic, melt blending of, 410
large strain deformation, prediction, 16
liquid crystal, orientability in elongational flow, 887
long term behavior of, nonlinear characterization, 144
melt devolatilization, 510
molten, transesterification reactions in, 1221
necking of, thermal effects in, 1399
nonlinear viscoelasticity of, Fourier transform mechanical analysis, 165
semi-crystalline, elastic contact stress analysis, 999
solid, multiaxial nonlinear viscoelasticity, 155
surface modification, fluorine-containing plasmas, 861
thermal diffusivity in, solid and molten state, 906
thermotropic liquid crystalline
rheological characterization, 1156
rheology and texture, 816
thermo-viscoelastic constitution of, volume change and, 86
tough, fracture toughness and crack instability in, 1128
viscoelastic and aging characteristics, 141
Polymer solutions
concentrated
concentration, temperature and deformation effects, 1292
containing volatile solvents, rheometer for, 294
Polymer sorbents, phosphorus esters, 693, 703
Poly(methylmethacrylate)
copolymer blends of, oxygen permeation, 1611
high density, fatigue crack growth, loading history effects, 110
modified surfaces and, spectroscopic studies of, 939
Poly(methyl methacrylate)-poly(ethylene oxide) blends, deformation of, 433
Polyolefins
ω-functionally substituted, novel polyolefin inomers, 1461
thermo-oxidative degradative of, isothermal long-term DTA, 945
Polyoxetanes, supermolecular structure, equilibrium melting temperature relations, 781
Poly(paraphenylene terephthalamide), fibrous, strength and time dependent behavior of, 842
Poly(phenylene sulfide) blends, powder processed, structural investigation, 547
Polypropylene
biaxial orientation of, by hydrostatic solid state extrusion, 869, 876
bottles, ionic impurities in water and, 611
melt spinning, draw resonance, 192
poly(ethylene terephthalate) mixture, permeability of, 622
tensile yield in, 823
Polypropylene blends: *see also* specific blend
impact-modified, injection-molded specimens, skin-core morphology and failure of, 241
structure formation during flow, 1662
Polypropylene/elastomer blends, dynamic mechanical properties and morphology of, 254
Polypropylene-polybutylene blends, structure-property-processing relations, 1542
Polypropylene/polycarbonate blends, morphology, viscosity ratio effects, 1591
Polypropylene sheet, isotactic, uniaxial roll-drawing, 518
Polystyrene
blend of poly(2,6-dimethyl-1,4-phenylene oxide), diffuse shear banded zones of, 647
blend with poly (2,6-dimethyl 1,4-phenylene oxide), primary (glass-to-rubber) transition region, 1284
carbon dioxide sorption of, orientation effects, 1334
Polystyrene blends: *see also* specific blend
polymers based on, 684
Polystyrene-polybutadiene-chloroform, phase behavior studies, 1688
Polystyrene/polyethylene melt blends, reactive mixing process, 1634
Poly(styrene-*p*-tert-butylstyrene) copolymer end segments, thermoplastic block terpolymers containing, 1300
Polyurethanes
computer-controlled multiple-stream RRIM production of, 1209
interpenetraing polymer network based on, polymerization of, 716
reaction injection molding
adiabatic reactive viscometry for, 1237
microstructure and mechanical behavior, 1258
rigid, integral-skin foams, insulation cases for car air conditioners, 1323
Polyurethane elastomers, polybutadiene and aliphatic diols in, 286
Polyurethane-polyphosphonate blends, nuclear magnetic resonance studies, 1504
Poly(vinyl chloride)
electrical conduits of, 1469
recovery, 26-year creep and, 582
unplasticized pipe, degree of gelation in, untouched impact bend test, 277
Poly(vinyl chloride) blends: *see also* specific blend
chlorinated polyethylene and acrylic resin effects, 398
chlorinated polyethylene and polyethylene effects, 391
Poly(2-vinyl pyridine), miscible nylon blend with, 857
Potentials, deformation and fracture characterization with, inelastic composite materials, 63
Power law fluid, flow distribution, spiral mandrel dies, 186
Propylene, polymerization, catalyst fragmentation during, 1436, 1448
Propylene copolymers, unusual blend, melting and crystallization behavior, 458
Puncture testing
ductile thermoplastics, 262
problems, 773
Pyrex, bottles, ionic impurities in water and, 611

R

Reaction injection molding: *see* Injection molding
Reflection infrared spectroscopy, transmission and, injection-molded thermoplastics, 917
Rheology
ABA block copolymer melts, 586
copolymers containing carbon black, 1043
formation of dispersed phase, incompatible polymer blends, 335
linear low density polyethylene/polypropylene blends, solid state behavior, 1627
melt
chloro-polyether and polyepichlorohydrin blends, 402
polyarylate/polybutylene terephthalate blends, 529
mixing effects, polyethylene blends, 202
polymers containing carbon black, 1035
texture and, thermotropic liquid crystalline polymers, 816
thermotropic liquid crystalline polymers, 1156
Rheometer
concentrated polymer solutions, volatile solvents, 294
parallel plate, viscosity of guar gum solutions, 598
Rigid rod molecular composites, molecular entanglement for, 424
Roll-drawing, uniaxial, isotactic polypropylene sheet, 518
Rubber, natural, modification of butadiene-acrylonitrile rubber, 1137

S

Scanning electron microscopy, electrical conduits of poly(vinyl chloride), 1469
Screw extruders: *see* Extruders
Sheet molding compound, compression molds, thermal and cure analysis, 218
Shrinkage analysis, ultra-high molecular weight polyethylene parts, 524
Siloxanes, copolymer blends of, oxygen permeation, 1611
Solvents, volatile, concentrated polymer solutions with, 1292
Space-time distributions, filling a mold, 1229
Stress
elastic contact analysis, semi-crystalline polymers, 999
residual
injection-molded amorphous polymers, 1069
mechanical properties of glassy polymers, 1473
Stress-cracking, high density polyethylene, detergents, 82
Styrene-acrylonitrile
copolymer films, biaxially oriented, shear yielding of, 1095

dynamic mechanical behavior, 568
Styrene-acrylonitrile/poly(methylmethacrylate), transition to homogeneous melt state, 351
Styrene-butadiene rubber, modification of butadiene-acrylonitrile rubber, 1137
Styrene/butyl acrylate, copolymerization, layer morphology, 463
Substrates, polymers as, data storage, 1421
Supercritical fluid solutions, rapid expansion, formation of polymer fibers from, 1693
Supermolecular structure, equilibrium melting temperature and, polyoxetanes and polyethylene oxide, 781

T

Teflon-FEP, bottles, ionic impurities in water and, 611
Temperature rising elution fractionation techniques, polyethylene-based blend characterization, 1562
Tensile behavior, ductile thermoplastics, 262
Tensile creep tests, electrical conduits of poly(vinyl chloride), 1469
Tensile yield behavior, polypropylene, 823
2-Tertiary-butyl-4-methoxy phenol, from high-density polyethylene film, 934
Thermal techniques, physiochemical kinetics, practical aspects of, 764
Thermomechanochemical degradation, nonlinear response and, urethane elastomer, 131
Thermoplastics
amorphous, viscosity temperature behavior of, 810
injection molding of, dynamics and control of pressure, 1403
rigid rod molecular composites, thermal analysis studies, 1557
Thermoplastic blends, ductile tearing instability, 1164
Thermoplastic block terpolymers, containing poly(styrene-*p*-tert-butylstyrene copolymer end segments, 1300
Thermosets, unfilled, fracture surface characteristics, 55
Thermo-viscoelasticity, nonlinearly, volume change and, polymers, 86
Transesterification
dimethyl terephthalate, with ethylene glycol, model, 1703
molten polymers, 1221
T6T145/F185 composite, fracture, crack tip damage zone for, 33

U

Untouched impace bend test, degree of gelation, unplasticized poly(vinyl chloride) pipe, 277

V

Viscoelasticity
aging and, polymers, 141
nonlinear
application of a coupling model, 2
graphite/epoxy composites, 116
multiaxial, solid polymers, 155
polymers, Fourier transform mechanical analysis, 165
Viscosity ratio, polypropylene/polycarbonate blend morphology and, 1591
Viscosity temperature behavior, four amorphous thermoplastics, 810

X

X-ray pole figures, small angle and wide angle, poly(ethylene terephthalate) films, 893
